Open House for a Proposed Roundabout at Quarry Road and Colville Road

Dear Resident,

The Rural Municipality of St. Clements has engaged Stantec to design a roundabout for the intersection of Quarry Road and Colville Road / Kittson Road (Provincial Road 212). This intersection is busy at peak times and the current configuration on a curve is hazardous for pedestrians, cyclists, and motorists.

Replacing the existing stop sign with a roundabout will improve safety for all users and slowing traffic while keeping it flowing.

We would like to invite you to attend an open house to learn about this project. There will be display boards and members of the project team available to answer questions.

The open house will be held:

Date: Wednesday, April 29, 2026

Time: 6:00 – 8:00 pm (come and go)

Location: East Selkirk Hall, 711 Old Henderson Highway, East Selkirk, MB

An RSVP to the open house is not necessary, but if you have any questions about the project or would like to continue the conversation via other methods, please don't hesitate to contact us at either (431) 815-4248 or adam.prokopanko@stantec.com.

Thank you for taking the time to consider contributing to this project, and we look forward to hearing from you.

Adam Prokopanko
Engagement Lead
